POE-SWR712GM-10G

L3 managed industrial PoE switch

POE-SWR712GM-10G is a L3 managed PoE industrial switch developed independently. It has 8*10/100/1000Mbps RJ45 ports, 4*10Gbps SFP+ fiber module expansion slots and 1*Console port to flexibly expand your network. Among them, ports 1-8 have PoE power supply function, support IEEE802.3bt standard, support static routing function, provide perfect security policy, QoS policy and rich VLAN function, with ring network function, can form a ring network, and form a ring network topology between switches through hand in hand. Its redundancy, high reliability and other characteristics can make a link in the ring network disconnection, will not affect the network data forwarding.
Outstanding Features

- PoE supports IEEE802.3bt standards, with a maximum output of 90W per port.
- Data transmission and power supply distance up to 100 meters.
- Support IEEE802.3x full duplex flow control and Backpressure half duplex flow control.
- Panel indicator to monitor working status and help fault analysis.
- Aluminum alloy high energy roof heat conduction groove design.
- Supports one-key ring network and one-key storm suppression function, with redundant design and high reliability.
- High reliability design, support the traditional STP/MSTP/RSTP Layer 2 link protection technology.
- Supports static aggregation and dynamic aggregation (LACP), which increases link bandwidth, improves link reliability, implements load balancing, and link backup.
- Flexible and convenient management and maintenance Support Console, Telnet, SSH and other management modes.
- Supports WEB management, which is simple and efficient, and convenient for installation and commissioning by engineering and maintenance personnel.
- Supports HTTP, TFTP, and FTP file upload and download management.
